Santiago Galán Barlo

Frontend Developer/Product Engineer
in Buenos Aires 🇦🇷

Summary

I strive to develop exceptional, well-crafted products that leverage technology to solve real problems and create meaningful experiences for users.

Experience

Freelance Product Engineer
August 2023 - Present

- Built [RaceWeek](#), an F1 companion React Native app, leveraging Expo for seamless development and distribution.
- Built [sharepreviews.com](#), a Figma-like web editor to create dynamic OpenGraph images.
- Collaborated with the [BaseHub CMS](#) team to ship a new feature based on SharePreviews.
- Built several side-projects like [dolarya.info](#), [icons.com.ar](#) or [notiBelo](#).

Product Engineer @ Welook
May 2023 - August 2023 (4 months)

Had a more product-focused role, working along the project manager and designers. Continued to develop the platform.

Frontend Developer @ Welook
June 2022 - May 2023 (1 year)

My responsibility was to develop the company's various applications and websites alongside the team's technical lead. Some of these producats included:

- A ticketing and access control platform used in over 20 events, including one with more than 13,000 attendees.
- A web app for visualizing, organizing, and sharing content based on digital collectibles.
- A website to promote an in-person hackathon event with over 100 participants.

Education

Javascript & Startup Schools @ Platzi

Business Administration @ University of Buenos Aires (UBA) (2020-2022)
